Summary

As a skilled and experienced frontend developer, I possess a strong track record of success in developing and maintaining web applications, managing development teams, and delivering high-quality work on time and within budget constraints. My skills in design patterns, architectural solutions, testing, debugging, and refactoring have contributed to successful projects, including CRM systems, POS systems, ecommerce platforms, admin panels and landing pages. Additionally, I have a proven ability to troubleshoot and debug client-side applications, ensuring optimal performance and user experience. I have demonstrated strong leadership and project management skills, collaborating effectively with team members to deliver exceptional results. Overall, I am a talented and motivated software developer with a passion for innovation and a commitment to delivering exceptional results.

Skills

Javascript, TypeScript, React, Redux, Webpack, Next.js, GraphQL, REST, Functional Programming, Object Oriented Programming, Design Patterns, Data Structures and Algorithms, GIT, Sass (Syntactically Awesome Style Sheets), CSS, Jest, Agile, GitLab, JIRA

Experience

Invan LLC | Tashkent, Tashkent
Lead Front End Developer | 09/2022 - 03/2023

Responsibilities:

- Led daily stand-ups and retrospective meetings to facilitate effective communication and collaboration among team members
- Created and managed sprint plans to ensure timely delivery of project milestones
- Mentored and supported other frontend developers by conducting code reviews and providing technical guidance

Accomplishments:

- Implemented innovative design patterns and architectural solutions to enhance the functionality and user experience of the client-side of the POS system
- Successfully managed a team of 12 developers under Agile methodology, utilizing tools such as Jira and Slack to streamline project workflows and maximize efficiency
- Received positive feedback from stakeholders for delivering high-quality work on-time and within budget constraints

EPAM Systems | Tashkent, Tashkent
Software Engineer | 06/2022 - 09/2022

Responsibilities:

- Maintained and improved the internal web application, ensuring smooth and efficient functionality
- Implemented new features and functionalities to enhance the user experience and streamline processes
- Conducted rigorous testing, debugging, and refactoring of existing code to improve performance and eliminate errors
- Identified opportunities for optimization and implemented solutions to increase efficiency and reduce load times

Udevs | Tashkent, Tashkent
Front End Developer | 10/2020 - 06/2022

Responsibilities:

- Developed and implemented code solutions to solve complex business problems and meet project requirements
- Translated Figma designs into fully functional web pages with pixel-perfect precision
- Collaborated effectively with a team of developers to deliver high-quality work in weekly sprints
- Participated in code reviews, trainings, daily stand-ups, and other team activities to ensure successful project delivery
- Troubleshot and debugged client-side web applications to ensure optimal performance and user experience
- Applied unit testing to existing functionality to ensure robust and error-free code
- Utilized REST API to integrate frontend components with server-side infrastructure

Accomplishments:

- Successfully participated in the development of around 10 projects of varying types and complexities, including CRM systems, POS systems, e-commerce platforms, and landing pages

Education

Westminster International University in Tashkent | Tashkent, Tashkent
Business Information Systems | 05/2023

- Demonstrated the ability to translate business needs into technical solutions by successfully building a fully functional SaaS product for a startup company as the final project
- Gained extensive knowledge and experience in various areas of software development, including desktop applications development, mobile development, game development, web development, machine learning, and data science
- Acquired practical skills in project management, software design patterns, version control, agile methodology, and other software engineering best practices
- Collaborated effectively with team members on group projects, demonstrating strong communication, leadership, and problem-solving abilities
